* Includes drain hose (OD16mm)

Temperature Range

-20~60°C

SLIMDUCT SD is fully provided with corrosion proofed stainless screws.

Screws are essential to keep the trunking protected permanently in any exterior environment.

Without the screw, duct cover could fall off due to UV deterioration, storm, pest, or any damageable elements.

Specific Features

Optional coloured screws will blend the system into indoor applications.

Flexible joint SF has more flexibility and workability than any other brand.

Specially designed cutter VD-2100 cuts both the cover and the base at the same time cleanly and safely.

Comes with most wide variety of fittings in the HVAC industry. Enables to complete the job for any complicated pipework.

Fittings come with a hook pin to prevent the cover from sliding off.
